

Before the Iowa Medical Cannabidiol Board
Friday, May 13, 2022

It's mind boggling that any state would intentionally create a program where everyone participating is in violation of federal drug law.

States have the constitutional right to create these programs and we the people expect the federal government to honor ours.

We also expect our state to defend us. What a shame and disgrace our state executive branch won't defend us without being sued in court.

President Biden campaigned saying states should be free to set their own policy on marijuana. A federal executive branch agency, the DEA, has the authority to make it happen under Title 21 United State Code, section 822(d). 21 U.S.C. § 822(d).
